March 27, 2020

To whom it may concern,

It is with enthusiasm that I am writing to recommend the services of StarDust Games. My company, Satel Creative, engaged their services in January of this year to fulfil a need in our business for 3D modelling and texturing. In our dealings with StarDust Games, they have exceeded our expectations in attention to detail and quality of work.

Rohit and team are strong in creating models that are presented to the requested specifications and within set timeframes. They display professional communication, while being easy to work with and readily available to discuss the scope of our projects and answer any questions I or my team may have along the way.

I feel confident in recommending their services, and my company looks forward to continuing our own relationship with StarDust games.

If you have any further questions on my experience working with StarDust Games, please don't hesitate to contact me.

Sincerely,

Hossein Maleki
